No prior experience of licensing required.

The Eyebrow Fundamental: 2022 Edition

100 Hour Microblading & Device Course.

Valspa Beauty & Aesthetics

Fundamental Training Course teaches the fundamental knowledge needed to become a certified micropigmentation artist, focusing solely on eyebrow pigmentation. Students will learn Powder Brows using digital devices, microblading brows using microblades and basic principal of Lips and eyeliner. You will learn the difference between each technique and wich one is best for the client depending on skin quality and desired results.

Certificate: Upon successful completion, you will receive a certificate that shows you have completed the fundamental/primary micropigmentation training necessary to become a certified microblading/micropigmentation artist.

Class Materials Included

This course will included everything you need to practice from home, including:

- Nedles;
- Microblades;
- Pigments;
- Practice pads and mannequin head;
- Training materials

Class curriculum

This 100-hour fundamental includes everything you'll need to know to start out successfully: skin anatomy, color theory & pigments, esterilization, medical history/client information + consultations, equipament/needle selection, facial morphology, how get your own practice/office started, and much more.

Part 1 - Pre-Study Manual (40 study hours)

Upon registration, you will receive your textbooks to get started in training, even before class meets.

Part 2 - Training (2 full days)

Part 3 - Fundamental Hands-on Training (6 days at our academy)

Hands on practice with 6 live models in our student clinic.

- Consultations: All of the important details that go into a client consultation including the documents they will need to fill out.
- Shaping: How to shape perfect eyebrows on each face shape and the tricks and secrets to perfecting symmetry.
- Techniques: Lucy will teach you the techniques she uses to achieve perfect brows.
- Skin: Differences in skin types and how to work with each type to ensure a successful outcome.

- Color Theory: Choosing the right color pigment for each client and skin type.
- Pre & Post Care: Important pre & post-care instructions given to clients.
- Content: How to create quality content for your website & social media platforms with specific apps and filters.

It's not rocket science but there is a lot of info so prepare to learn. Of course, you will need to look into the specific regulations in your State and City but as far as being prepared to get started with your Microblading career, we've got that covered.

All students will receive all the materials they'll need for practice in class.

Valquíria is done thousands of Microblading & Permanent Makeup procedures and she's ready to share all of her expert knowledge with you. No holding back! Every trick, every detail that she's perfected will be shared with you!

Pre-requisite: blood born pathogens

Occupational Safety and Health Administration (OSHA) and the Massachusetts Department of Public Health requires all students to study and pass a Blood borne Pathogens/Communicable Diseases certification. It is not necessary to complete this certification until you are registered for class. This training can be completed online. We recommend www.yourtrainingplace.com.
